PROFILE:

As an engineer for geo-informatics and surveying, I am skilled in the precise surveying of land, buildings, and objects, as well as software and app development, the usage of databases, data entry, and the computer-aided construction of maps and plans. I am able to work independently with minimal or no supervision and also able to ensure 30 percent reduction in maintenance cost when compared to previous years. I am seeking a challenging and rewarding career where I can utilize my skills and knowledge to make a positive impact in the field and also boost the income of any organization, I find myself. I am opened to diversification to any business sector that will enhance and boost my professional intellectual.
